

# Laser Spot Welding

**We are capable to make less thermal deformation by accurate positioning welding.**

By using our laser spot welding, we can make fabricate simple jigs with short L/T and low cost.

- Short L/T capable!
- Low cost capable!
- High volume capable!
- Available from one piece!

**We can solve your common problems:**

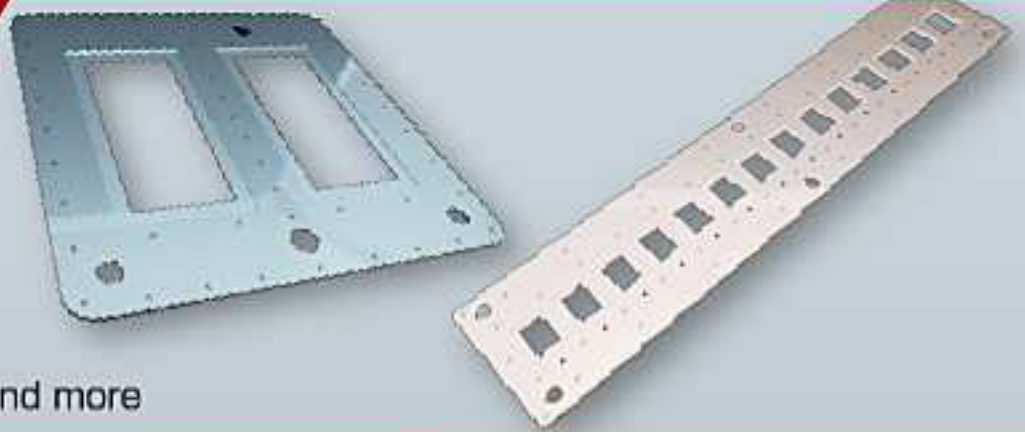

[Image picture of spot welding marking]

- Cost is expensive!
- Lead time is long!
- We want simple trays right away!
- Peeling off problem by resistance spot welding!
- Difficult to welding on foil or small components!
- We need stronger bonding!
- Difficult to welding due to thickness is too thin!

## Product examples

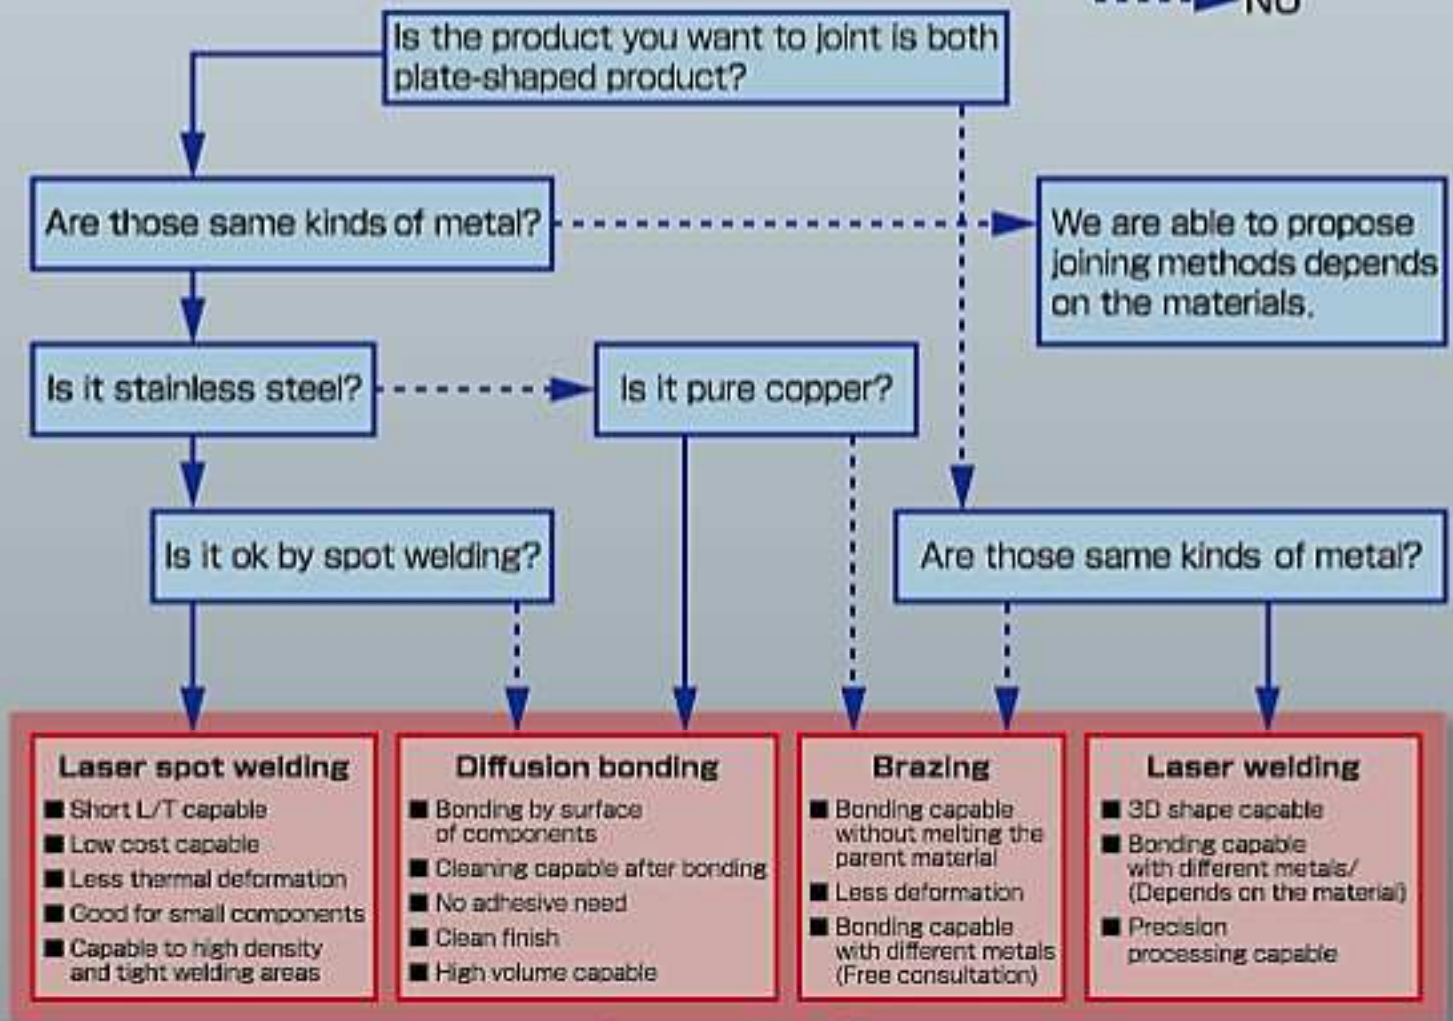

- Transfer jigs
- Drying jigs
- Absorption jigs
- Assembly jigs
- Transport jigs
- Inspection jigs
- Mask plates

...and more

## Yes / No chart to choose right welding

—▶ YES  
- - -▶ NO

**We can support every option!**
